

## Business Card Rectangle Digital Print

Data Capacity: 50 mb

Disk Size: 61 mm X 85 mm

Printing Dimensions

Art Size: 61 mm X 85 mm  
center hole: 23 mm diameter

### For A Quality Print **All Images Must Be 300 dpi or Higher**

1. If you are working with a layered program please place your art on a layer named **"Art Here"**.
2. The **BLUE** shaded area is the final disk size **"Printing Area"**
3. The **GREEN** outlined **"Bleed"** is the required bleed line around the disk.  
We require a bleed to assure complete, to the edge coverage.
4. Please **Outline, Render, or provide the font** for all of your text.  
If we do not have a font we can not print or set up your art unless we change the font.
5. Embed Your Art pieces.  
A Forgotten art piece is a common holdup for time sensitive projects.
6. Do Not flatten template to art.  
If your final saved file format does not allow for layers then place a dot or X for the center of the disk and discard the template. Only do this if you must.
7. We print in **CMYK**.  
If you use RGB or Pantone color images they will be converted to CMYK.
8. The white flood makes your art opaque.  
Please alert your sales representative if you have silver knockouts or do not want a white flood.  
In between the **RED** "Knockout Guide" lines is the uniform silver space of the disk for your knockouts.
9. For any questions at all, do not hesitate to **call your sales representative**.
